**OWNER ASSIGNMENT FOR STATEMENT OF WATER DIVERSION AND USE NO. S010402  
AND ADDRESS CHANGES TO S000996, S000997, S001006, AND S001007 FOR  
DIVERSION FROM VARIOUS STREAMS TRIBUTARY TO VARIOUS STREAMS IN  
TUOLUMNE COUNTY**

On January 13, 2005, the State Water Resources Control Board, Division of Water Rights (Division) received a Supplemental Statement of Water Diversion and Use (Statement) No. S010402 changing the ownership of the Pre-1914 claim of right from the County of Tuolumne to the Tuolumne Utilities District. In addition, Division staff confirmed by telephone with the Tuolumne Utilities District on August 11, 2005, that Statement Nos. S000996, S000997, S001006, and S001007 (owned by the Tuolumne Utility District) will also be updated to the address provided on Statement No. S010402.

Division staff updated the ownership information on Statement No. S010402, and the address information on Statement Nos. S000996, S000997, S001006 and S001007 to show the following:

Statement IDs:	S010402, S000996, S000997, S001006, S001007
Current Owner:	Tuolumne Utilities District
Mailing Address:	P.O. Box 3728 Sonora, CA 95370
Telephone:	(209) 532-5536

A Supplemental Statement will be mailed to you every three years. The submittal of a Supplemental Statement is the record of your water use. It is used by the Division to verify existing data and also gives the Division the ability to notify you of water right matters related to your riparian claim.

Should you have questions regarding this matter, please contact me at (916) 341-5376 or [brigby@waterboards.ca.gov](mailto:brigby@waterboards.ca.gov).

Sincerely,

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

D	SECONDARY [TREATED WATER] CONSUMERS IN PEPPERMINT CREEK AND RAW WATER CONSUMERS (W. PULPIT ROCK). "IRRIGATION ACRES" ARE ESTIMATED BASED ON 3 ACRES PER AC. FT. SOLD FROM THE TABLE MOUNTAIN AND MONTEZUMA DITCHES. THE SAME ACREAGE IS INCLUDED IN THE TOTAL "IRRIGATION ACRES" FOR 5000996.

#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California; riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on their riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available, including the following:
